

Overview

This document describes the user process for the **GSTN** Business Central extension. It covers the current setup pages, customer/vendor actions, invoice actions, and staging pages.

1. Installation

1. Deploy the **GSTN** extension package to your Business Central environment.
 - Use the **.app** file for the version you want to install.
 - Publish the extension from the Business Central Extension Management page.
2. Verify that the extension is installed successfully.
 - Open Extensions Management in Business Central.
 - Confirm **GSTN** appears in the installed extensions list.

Screenshot

2. GST Authentication Setup

1. Open the page **GST Authentication Setup**.
2. Enter the required values:
 - **Base URL**
 - **GST App ID**
 - **GST App Secret**
3. Use **Generate Token** to request a new access token.
4. Confirm the prompt and verify that the token fields are updated.

3. Customer and Vendor GSTN Detail Fetching

Customer

1. Open the standard **Customer Card** page.
2. Use the **Fetch GSTN Details** action in the Processing actions.
3. Confirm the prompt to fetch and update GSTN details for the current customer.
4. Review the updated customer GSTN fields.

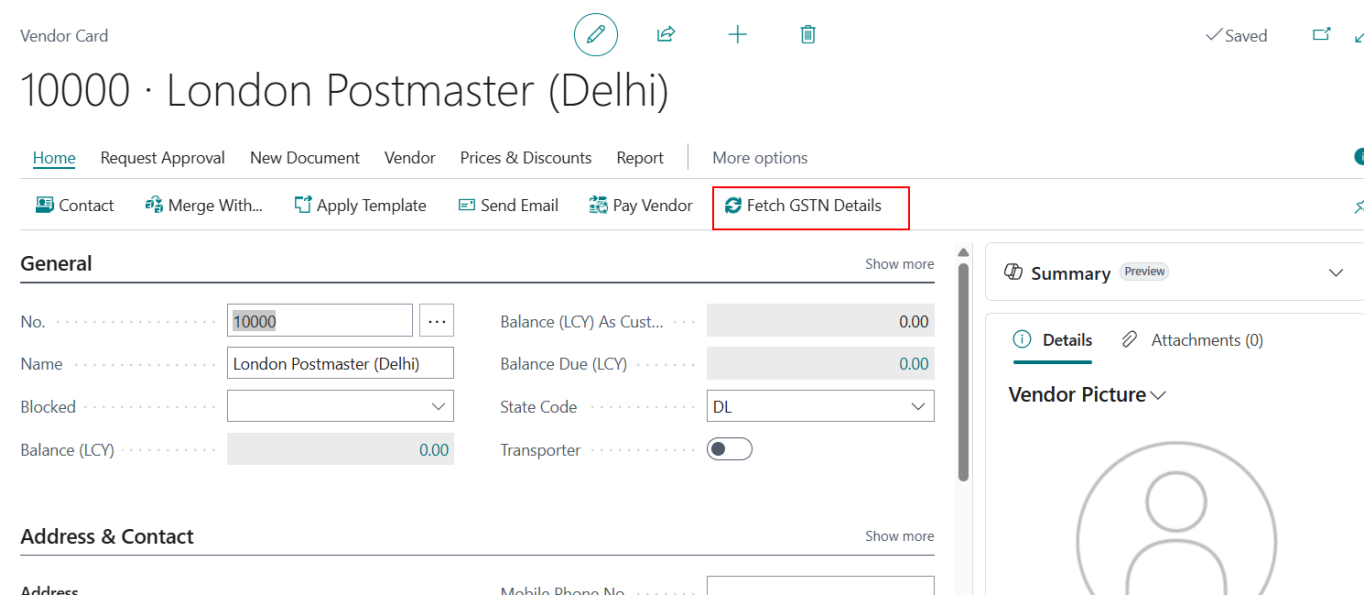

Screenshot

Vendor

1. Open the standard **Vendor Card** page.
2. Use the **Fetch GSTN Details** action in the Processing actions.
3. Confirm the prompt to fetch and update GSTN details for the current vendor.
4. Review the updated vendor GSTN fields.

Screenshot

4. Posted Sales Invoice Actions

1. Open the standard **Posted Sales Invoice** page.
2. Select the invoice to process.
3. Use **EI - Generate IRN** to generate an IRN for the selected invoice.
4. Use **EI - Cancel IRN** to cancel IRN generation after it has been created.
5. Use **Generate E-Way Bill Enriched** to generate an enriched e-way bill.
6. Use **Cancellation of E-way** to cancel an existing e-way bill.
7. Review the **IRN QR Code** FactBox on the invoice page for generated QR code data.
